Attorney Docket No.: 1238.72142 :  
For: CHIRAL CATALYST, PROCESS FOR :  
PREPARING THE SAME. . . :

This is in response to applicant's "Request for Corrected Filing Receipt" filed 07 September 2005.

On 15 December 2004, for a small entity the basic national fee under 35 U.S.C. 371 was \$150.00, the search fee in cases which a search report was provided to the USPTO was \$200.00, and the examination fee was \$100.00. See *Federal Register*, Vol.70, No.20, pp.5053-5, February 1, 2005. Therefore, the national stage fees totaled \$450.00, and no fee correction on the filing receipt is indicated.

A corrected filing receipt which reflects the proper number of independent claims will be sent under separate cover.

**PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process simplifies the filing of patent applications on the same invention in member countries, but **does not** result in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

**LICENSE FOR FOREIGN FILING UNDER****Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

(54) Title: CHIRAL CATALYST, PROCESS FOR PREPARING THE SAME AND ITS USE IN THE OXIDATIVE COUPLING OF NAPHTHOLS

(54) 发明名称: 用于氧化偶联萘酚的手性催化剂及其制备方法及应用

(II)

(57) Abstract: The present invention concerns a chiral catalyst that can be used in the oxidative coupling of naphthol, characterized in that the said chiral catalyst is a complex between vanadium and a Schiff base which is formed by a chiral amino acid and a formyl-biphenyldiol, wherein the chirality is induced by the chiral amino acid. The complex has following structure [I]: wherein R is selected from the group consisting of benzyl, isopropyl, isobutyl and tert-butyl; and the amino acid has R or S configuration. When the chiral catalyst of the present invention is used in the catalytically oxidative couplings of naphthols or their derivatives, optically highly pure binaphthylidiols or their derivatives can be obtained.
